PRESENTATION

We make fibres perform – 365 days a year, located in Troisdorf, North Rhine-Westphalia, Germany.

Our nonwoven products – Melt-Blown, Spunbond, Composites and Laminates – are distributed worldwide and available as roll-goods, individually converted.

Individual coloring according to RAL or Pantone standards are part of our portfolio as well as the optional finishing with additives to obtain specific product properties.

Our product categories InnovaFiltex®, InnovaSorb®, InnovaMed®, InnovaSpun®, InnovaTec® and InnovaWipe®, are basis to applications in industries like automotive, construction, medical, hygiene and filtration. The potential fields of applications are versatile.

Being certified according to ISO 9001 reflects our own quality demand. The in-house laboratory ensures the quality requirements of our customers at any time.

PRESENTATION

Welcome to Fulflex, makers of thin-gauge specialty elastics

Whether it's making swimwear more comfortable, first responder gear safer or industrial gaskets tighter sealing, our purpose is to help improve the user experience of every product we touch. It's all about optimizing the comfort, fit and performance of your solutions.

The truth is, many products couldn't perform the way they should without Fulflex elastics. So, of course, we take pride in producing the industry's best thin-gauge specialty elastics. We labour over all the details to get it just right. Comfort, fit and performance are what differentiate our products.

Our Comfi-Fit® elastics are ideal for providing the maximum consumer comfort, no leakage and providing optimal skin health by preventing red marking. Comfi-Fit® elastics are available in a range of colours and can be used to mask unpleasant plastic/chemical odours for a better "out of the bag experience".

Olfasense – Excellence in Odour Testing

As an accredited test laboratory, Olfasense conducts analyses, research and development in the fields of sampling, assessment and measurement of odours with a view to optimising your product both on the level of perception and costs.

The main focus of our activities is to evaluate the odorous properties of products and materials from a human sensory viewpoint. A range of standard techniques are used, and bespoke tests are commonly designed to fit your requirements. It is possible to evaluate the properties of solid materials, liquids, and gases.

Our capabilities include

- Sensory analysis to determine parameters, such as odour concentration, odour intensity, hedonic tone and acceptance, as well as polarity and aromatic profiles
- GC-MS, GC-IMS and GC Sniffing
- Field research, using, for instance in-use tests and text message voting
- Training & consulting in all odour matters concerning the measurement and assessment of odours

PRESENTATION

Kansan Machinery has held the pulse of wet wipe industry for almost a decade now. Now Kansan has two new machines that are ready to be recognized by the industry globally.

An Upgraded Cross Fold Line – Compact and Efficient Unlike other cross fold machines, Kansan's Flexiwork model is compact, fast and most importantly doesn't sacrifice hygiene to get high end results. Flexiwork functions with only mechanical folding up to 500 cuts/minute while it can work with 700 cuts/minute with vacuum if more capacity is requested. The distance between wetting and cutting is very short on Flexiwork. This gives the opportunity to work with sensitive materials such as wetlaid and airlaid effortless with ease.

High Capacity Flow Pack with No Hustle Kansan's Acurapack series for flow pack machines has spread to 5 continents. Now there is a new model, Acurapack 160, with 150 packs/minute design capacity.

PRESENTATION

Cellulose Converting Solutions (CCS) is an Italian company which engineers and installs complete lines for the manufacturing of disposable hygienic products, such as baby and adult diapers, in the brief and pull on configuration, lady sanitary napkins and panty liners, maternity pads, light incontinence products for women and specific for men, bed protection, meat pads, etc. At same time, CCS is largely appreciated for its engineering of solutions to the upgrading of existing equipment, regardless of their original construction brand; as well for its flexibility and adaptability to customer needs.

The company is ISO9001 and OHSAS 18001 certified, in its efforts to be the most reliable partner for the hygiene converters all over the world.

After many years of experience, we still work with passion and competence, constantly striving to create new technologies able to support any idea.

OUR PRESS PARTNERS

<h3>Innovation in Textiles</h3>	
<p>advertise@innovationintextiles.com www.innovationintextiles.com</p> <p>PRESENTATION Innovation in Textiles was launched in 2009, one year after the launch of Knitting Industry. Based on the success of our first publication, we realized there was a need for a publication dedicated to the many new technologies that were being introduced into the traditional world of textiles and had the potential to completely revolutionize the entire industry. Readers can access all of our current and archived content on a free of charge basis and can opt to receive our weekly e-newsletter. Members, additionally, have the option of receiving customised daily news alerts. Our readers range from those at the cutting edge of R & D, to those involved in every stage of the supply chain across this wide range of technologies and markets, including buyers and specifiers of raw materials, machinery or finished goods.</p>	

<h3>MENAFN</h3>	
<p>ads@menafn.com www.menafn.com</p> <p>PRESENTATION The Middle East North Africa Financial Network, Inc. (MENAFN) is the leading provider of online financial content and technology platforms to leading institutions and consumers around the Arab world. MENAFN was founded in June 2000 by a team of serial entrepreneurs with successful track records in the region. The company is a Delaware-based corporation with a wholly owned subsidiary in Amman, Jordan and a fully paid-up capital of \$2 million.</p>
